CASE EXAMPLE:

ATLANCO, A military and law enforcement apparel manufacturing customer, needed to move its two primary e-commerce sites to Azure CSP and take advantage of better response times, availability, and scalability. Atmosera worked with ATLANCO developers to determine how to most effectively deploy in Azure and achieve the results desired. Atmosera was selected based on our Azure expertise and ability to monitor the environment 24/7.

ATMOSERA SOLUTION:

Atmosera implemented ATLANCO'S move to Azure CSP, reducing the time to launch in Azure to less than one month. We deployed in multiple Azure regions for resiliency and lower latency, and added 24x7 proactive monitoring of the environment and websites.

CUSTOMER TESTIMONIAL:

"Atmosera provided the expertise to properly assess our needs and deploy the Azure environment. Atmosera now operates it 24x7, enabling our team to focus on our business without worrying about underlying systems"

- Executive, ATLANCO

Atmosera Managed Azure Value

As an expert MSP specializing in Azure, we are able to provide the performance benefits and environment value that manufacturing organizations require. We can provide our customers:

Reduced costs in Azure compared to an on-prem environment

Better performance with decreased TCO

Azure Optimization to maximize return on Azure investment

Azure Security Center and MDR for constant threat detection

Complete compliance in the Cloud including PCI and NIST

Azure DevOps to deliver apps at velocity using a DevOps Pipeline Platform

➔ Experience improved Azure performance benefits for your manufacturing operation through a managed Azure environment with Atmosera
