CASE EXAMPLE:

A global clothing manufacturer and retail customer was struggling to transition to an insight-driven organization because of latency issues with their BI Platform. The customer understood it needed to make its BI Platform and the generated data more user-friendly and accessible to a global workforce. Atmosera was selected because of our geographic reach and a fully-vetted design meeting customer needs.

ATMOSERA SOLUTION:

We developed a "follow-the-sun" database for the customer, with replicas in each region where the manufacturer has teams. By moving the primary replica, users have maximum speed available to them to perform data analytics and BI work during their workday. Initial BI reporting and cached reporting saw a 5x improvement across regions. We were able to remove existing complexity and drastically increase productivity.

CUSTOMER TESTIMONIAL:

"Atmosera met the requirements we were looking for, had extensive experience working with Azure, and could design a solution in such a way that it would not impact our existing platform."

- Chief Technology Officer

Atmosera Managed Azure Value

As an expert MSP specializing in Azure, we are able to provide the performance benefits and environment value that retail businesses require. We can provide our customers:

Reduced costs in Azure compared to an on-prem environment

Better performance with decreased TCO

Azure Optimization to maximize return on Azure investment

Azure Security Center and MDR for constant threat detection

Complete compliance in the Cloud including PCI and NIST

Azure DevOps to deliver apps at velocity using a DevOps Pipeline Platform

➔ Experience these improved Azure performance benefits for your retail operation through a managed Azure environment with Atmosera
